

Alistair Lenczner

A Partner of Foster & Partners Architecture Partnership

Topic of Speech:

"Architecture vs Engineering"

*How did the design disciplines evolve?
What is the modern relationship between architecture and engineering?
How have they shaped our built environment?*

His expertise:

A qualified chartered engineer, Lenczner now works as a partner with Foster & Partners and has experience of projects across Europe. This has given him both an engineering and architectural perspective of the design of buildings and the built environment.

Other Activities:

- Was in charge of the construction of the highest bridge in Europe – the Millau viaduct.
- Was involved in the Millennium Footbridge and the new Wembley Stadium.
- Is currently involved in projects including a Masterplan for the City of Stockholm and the Camp Nou stadium in Barcelona.
- Lenczner is also involved in a project for new high speed railway stations in the Middle East and in infrastructure projects in Asia and Latin America.

Date:

9th of February, Quarrel Room, Exeter College, 7.30pm
